

Pre-Primary

Smiles, laughter and cries filled the atmosphere at GICL as we welcomed the Transition 1 children into the Garodia family.

Their eyes beamed with eagerness and excitement when they entered the gate adorning their new uniforms, colourful bags and books.

Looking forward to a great year with these tiny tots.

Skipping in after the summer break...

June has arrived and our lovely children have grown and become confident. They all were happily geared up to sing, dance, play and listen to stories- all on the first day itself, with a BANG!!!

Children participated cheerfully in a circle time activity wherein they hugged each other and shared how they spent their summer holidays...

Primary

Young graduates

See me skip, see me run

I'm going to school just like everyone,

Grade 1 Grade 1 here I come...

Children entered their new classroom with excitement and smiles galore.

Meeting their old buddies, teachers, engaging in creative activities is how they spent their first week.

Illustrating and writing few sentences on their first week in Grade 1 was an interesting session. The week would have been incomplete without a Fun Friday Swimming Session. Splashing and playing in the pool was the best way to beat the heat.

We are back!

Our fifth graders welcomed this new academic year with some thought provoking activity.

The session started with the reflection of their actions in the previous year. They recollected the positive and the negative experiences of and shared the learning that they gathered. They reflected on how they could have improved in academics, behaviour and other life skills. With this kind of reflection activity they understood the importance of Goals in life.

Then the topic of Goal setting was discussed in detail. They understood that goals have to set in a manner which is Specific, Measurable, Attainable, Relevant and Time bound (SMART). As, goals give life direction, meaning, purpose and zeal, our fifth graders decided to set some wonderful goals for this academic year. Along with the personal goals they also set some group\class goals that they would strive to achieve as a team.

According to the students, this activity was extremely motivating and inspiring. Kuddos to our fifth graders!

FUNTOOT

Math could be real fun with Funtoot. The new program designed to differentiate instructions in math drill and skill-building has kick-started this week in the school. Topics have been activated for every grade by their respective teachers and students are

being trained to use this program effectively. Parents would soon start receiving the reports on their child's progress through email.

Nutri-Tip for the month

Flax seeds – Are these required for my children???

These little seeds are packed with nutrition not just for adults but also for the young master minds. They are dense in micronutrients and are available in all seasons. So what are you waiting for??

Follow these tips to add these power-packed seeds in your families' daily meals.

1. Sprinkle a pinch of powdered flax seeds into dals , sabjis, parathas.
2. Add some to gravies, salads and raitas.
3. Sprinkle into the wheat flour before kneading the dough into chapatis.
4. Do not forget to add them to the dishes you bake - Cookies / cakes / breads

Play to Win.....

With a new academic year comes a new challenge for the kids. All kids are gearing up to make their teams the best and win laurels for their houses. Children have started their training in Basketball and Soccer and each one of them are putting up their effort to make their team the best.

Secondary

German PASCH Summer Camp in Sri Lanka!

The German PASCH summer camp 2016 took place in the scenic Bandargama location of Sri Lanka. Two of our grade 9 German students (Ishan Kumar and Anshul Chadda) got the wonderful opportunity to participate in this camp.

Besides German language classes, students also participated in workshops on environment and creativity and team building activities.

The camp activities focused on nature and environment with an environmental tour of the area, visit to a Turtle Farm, Galle Fort and the Dutch Museum and cruise in Madu river,

This camp gave the students an opportunity to brush up their German language skills and interact with other PASCH students from South Asia.

German PASCH camps are quite popular world-wide given the exposure that the students get and this camp was definitely one of the enriching experiences for our students!

Treasure Hunt, where treasure is answer!

The students of Grade 8 had an exciting time revising the concept of equations with the help of a Treasure Hunt activity. Students select a card to start with and answer the question that is at the bottom of that card. To find the answer of the question they continue in the same manner until they get back to the card they had started with. Along with this fun-filled activity, kids enjoyed the revision of solving equations.
